

Agility isn't just for software teams—regardless of industry and function, every team can benefit from agile ways of working.

Agile methods enable teams to reliably deliver high-quality results faster than they ever have. In experience-based workshops, participants master the practices for agile teaming, adapting them where necessary to suit their team's needs.

Topics Covered

Agile practices and behaviors

- Delivering value in sprints
- Using a North Star to keep customers front and center
- Face-to-face interactions

Sprint planning

- Deciding on deliverables to be produced during sprint
- Prioritizing work, creating user stories
- Anticipating dependencies with other teams

Staying in sync through daily standup meetings

- Sharing progress and obstacles
- Improving coordination
- Getting help whenever needed

Radical transparency via agile boards

- Publicly displaying status of work
- Keeping each other accountable
- Facilitating communication between teams

Who this program is for

Team members who want to use agile methods to deliver high-quality results faster than they have before

Staying focused during sprints

- Networks of teams work in sync toward a shared objective
- Limiting work in progress, getting to “done”
- Welcoming changes that will deliver value to customers

Retrospectives and continuous improvement

- What went well, and what can be improved
- Promoting team growth
- Improving processes and results

Adapting practices to your organization

- Focusing on the principles over processes
- Experimenting with practices, seeing what works

How it works

- *Workshop*: 1-2 days
- *App*: 1 development journey
- *Coaching*: 10 weeks of check-ins

Value Created

For the team

Enhanced communication and transparency
Increased feelings of control and purpose
Greater focus and productivity

For the organization

Effective, cross-functional teams
Value is constantly delivered to customers
Boost in collaboration across network of teams

This program is founded on the latest insights in agile behaviors and methodologies. It is also informed by research in the spheres of organizational psychology and teaming.
